GOVISTUDIO

The SMB Lead-Leak Checklist

A practical self-audit by Govistudio. Answer each check Yes or No. Every "No" is a leak, and each one comes with a one-line fix.

1. Missed Calls

- [ ] **Does every missed call get an automatic text-back within 5 minutes?** Fix: Turn on missed-call text-back on your phone system or a VoIP tool.
- [ ] **Do you know how many calls you missed last week?** Fix: Switch on call logging and review a weekly missed-call report.
- [ ] **Is there a clear owner for returning missed calls each day?** Fix: Name one person per shift to own the callback list.
- [ ] **Can callers leave a voicemail that gets transcribed and routed?** Fix: Turn on voicemail-to-text and forward it to a shared inbox or CRM.
- [ ] **Do calls during busy periods roll over to a backup line or AI receptionist?** Fix: Set up overflow routing to a second line or a voice agent.

2. Slow Replies

- [ ] **Do you reply to new web-form enquiries within 15 minutes during business hours?** Fix: Send form submissions straight to a phone alert, not just an inbox.
- [ ] **Does every new lead get an instant acknowledgement?** Fix: Add an auto-reply that confirms receipt and sets a response time.
- [ ] **Are enquiries from every channel collected in one place?** Fix: Route email, forms, chat and DMs into a single inbox or CRM.
- [ ] **Do you have saved replies for your 10 most common questions?** Fix: Write templates for pricing, availability, location and process.
- [ ] **Is response time tracked for each team member?** Fix: Add a simple "first reply time" field or report in your CRM.

3. After-Hours Enquiries

- [ ] **Can a prospect get an answer or book a slot at 10 pm?** Fix: Add a chat assistant or booking link that works 24/7.
- [ ] **Does your website show a self-serve booking option?** Fix: Embed a calendar booking widget on your key pages.
- [ ] **Are overnight and weekend leads at the top of the queue the next morning?** Fix: Auto-tag after-hours leads and assign them first thing.

- [ ] **Does your out-of-hours message tell people exactly what happens next?** Fix: Rewrite it with a reply time and a booking link.

4. No-Shows

- [ ] **Do booked appointments get an automatic confirmation?** Fix: Send a confirmation by email and SMS/WhatsApp at booking.
- [ ] **Do customers get reminders 24 hours and 2 hours before?** Fix: Schedule two automated reminders with a one-tap reschedule link.
- [ ] **Can customers reschedule without calling you?** Fix: Include a self-service reschedule link in every reminder.
- [ ] **Does every no-show get a same-day "let's rebook" message?** Fix: Trigger an automatic rebooking message when an appointment is marked missed.

5. Lost Follow-Ups

- [ ] **Does every quote or proposal have a scheduled follow-up?** Fix: Create an automatic 2-, 5- and 10-day follow-up sequence.
- [ ] **Is every lead's status (new, contacted, quoted, won, lost) recorded?** Fix: Use a simple pipeline in a CRM or a shared sheet.
- [ ] **Do "not right now" leads get a check-in later?** Fix: Set a 30- or 90-day nurture reminder for parked leads.
- [ ] **Do past customers hear from you regularly?** Fix: Send a monthly or quarterly check-in or offer.
- [ ] **Can you see which leads have had no contact for 7+ days?** Fix: Build a "stale leads" view and review it weekly.

6. WhatsApp & DM Leaks

- [ ] **Are WhatsApp, Instagram, Facebook and LinkedIn messages checked at least twice a day?** Fix: Connect them to one shared inbox with notifications.
- [ ] **Is your business WhatsApp on a shared business account, not one staff phone?** Fix: Move to WhatsApp Business (or the API) with team access.
- [ ] **Do DMs get an instant greeting with a next step?** Fix: Set up an auto-reply with your booking link or key questions.
- [ ] **Are DM leads added to your CRM, not left in chat?** Fix: Add a "save to CRM" step or an automation that logs new conversations.
- [ ] **Do comment-based enquiries ("price?", "info") get a reply?** Fix: Use comment-to-DM automation for keywords on your posts.

Your Score

Count your "No" answers. **0–5:** tight system, fine-tune it. **6–12:** noticeable leaks, fix the top three this month. **13+:** leads are slipping through daily; automate the basics first.
